TERREIN

Watch this Space!

Danksy 'n ruim donasie is ons opgewonde oor 'n nuwe busstoor wat eersdaags op ons terrein opgerig gaan word. Dit sal ook as 'n onderdakfasiliteit vir 'n netbal- en tennisbaan dien en 'n lokaal wat vir groot funksies gebruik kan word. Meer inligting sal op 'n later stadium verskaf word.

Thanks to a generous donation, we are excited about a new bus garage that will soon be built on our school grounds. The garage will also serve as a covered facility for a netball and tennis court and a venue that can be used for large functions. More information will be provided on this project at a later stage.

AKADEMIE

Op Dinsdag, 27 Mei 2025 was die amptelike bekendstelling van ons BD Careers Club. Die gr 11- en 12-leerders het 'n sessie in die saal bygewoon waartydens me Minette Killian van Boland Kollege en mnr Tinus Janse van Rensburg van CSI Guardians ons leerders met moontlike loopbaanopsies bemagtig het.

IT: AI HACKATHON

Four BD's took part in the AI Hackathon and gained **8th place** among 60 schools, 225 teams and over 900 learners countrywide.

They called themselves the **Barrier Breakers**, and created a prototype app for Learning languages via AI.

About the project:

We used AI to summarise their project

Team "Barrier Breakers" from Bredasdorp High School has developed an idea for an AI-powered application designed to teach the basics of English or Afrikaans to South African children with different mother tongues. The team consists of four members aged 15-17.

The project addresses the significant educational disadvantage faced by 80-90% of South African children, largely due to language barriers. Many schools do not offer teaching in learners' native languages, which negatively impacts their ability to learn and understand subjects. This contributes to high dropout rates (around 40% before Matric) and poor basic reading skills among Grade 4 learners.

The proposed app aims to mitigate these issues:

- **AI Concept:** The app functions as a personalised tutor. Users select their mother tongue and the language they wish to learn (English or Afrikaans).
- **AI Functionality:**
- **Language AI:** Translates the app's interface and content into the user's mother tongue for ease of use.
- **Decision AI:** Assesses the user's proficiency via an initial test. It then personalises the learning path by detecting mistakes, adding problematic categories to a database, and adapting future lessons or providing focused materials like flashcards and videos. Users can also report translation errors to help improve the AI.
- **Impact:** The app aims to support children, especially from Grade 4 onwards when the language of instruction often changes, improving their comprehension and academic performance. The team envisions future scalability, adding more languages to address similar issues globally.
- **Ethics:** The team prioritises ethical considerations, including ensuring age-appropriate content, protecting user identities through anonymisation, and implementing strong password policies. Since the app will be free, electronic signatures are not required.
- The presentation includes images of the team members, a language demographics chart for South Africa, and mock-ups of the app's interface, along with a link to a team video.
