- Excellent finishing
- Rust proof
- Powder coated finish
- Can match existing cottage pane windows

# Why secure your home with DEFENDDoor?

- DEFENDDoor has been in business for over 20 years
- No plastic or nylon parts! It is manufactured only from high grade steel
- DEFENDDoors are insurance approved
- Manufactured with a single bar system to eliminate the possibility of using a crowbar to force bars apart
- Two separate hook locks rather than a single key-point locking in two places, twice as difficult to break through
- Reputable companies use us... Why? Because we are the BEST!!!
- Now with our latest patented design, no slots thus stronger bars
- The flights are locked into the bars
- Slides on sealed steel bearings. Sealed so the grease never escapes and the DEFENDDoor never needs maintenance
- Solid steel bolts locking into the bottom track, but freely movable making hacksawing virtually impossible
- A long lasting, durable powder-coated finish making repainting virtually a thing of the past
- Star Key Locks: No more weak, easily penetrated oval cylinders
- All essential rivets are now stainless steel
- The channel that protects the lock faces the wall, making attack with a crowbar extremely difficult

# Security hints and tips

- Test your home alarm regularly
- Never leave a door key in the door
- Never open your doors to strangers
- Most hijackings occur in your driveway so be very vigilant
- Make sure your bedroom area is secure with an escape route in case of fire
- Never leave a note on your house door stating when you will be back
- Make sure you know where your nearest police station is
- Know your neighbours and watch each others properties
- Never leave any tools or garden implements around that can be used to break into your house
- Make sure that the numbering on your house is prominently displayed and visible at night using reflective paint or nubmers
- Preferably never fit any security doors on the outside of your home as no alarms will be triggered and there will be little noise to alert you of a break in
- When leaving home, do not open the front gate until you have looked around for any suspicious characters. If there are any, then do not open the gate until they have left
- Keep your outside doors locked at all times
- Install a remote controlled gate
- Install infrared spotlights all around your home
- Install DEFENDoors on all your bedroom windows
- Install a DEFENDDoor with a Kwiklock in the passage
- If you lose your house keys, replace all the locks immediately
- Keep an important emergency number in the memory of your telephone
- Have your neighbours' work, cell and home telephone numbers on hand
- Have a telephone / cellphone in your bedroom so that you are able to telephone for help without leaving your bedroom area
- Be aware the criminals can follow you home from shopping centres as most people shop close to home
- When arriving home, do not enter the driveway of your home, but park on the verge and leave the car in gear until the gate has opened

Remember that it is better to be safe than sorry, trust your instincts and always be aware of your surroundings.
