

## AJAX ALARM SYSTEM

### **INTRODUCTION:**

AJAX's wireless alarm system offers detection possibilities both indoors and outdoors, which you cannot obtain with any other brand of an alarm system. Receive alerts on your smartphone before the intruder can even start forcing windows and doors.

AJAX alarm systems react faster to unwanted visitors than any other brand of system, thanks to unique wireless outdoor motion detectors that set off a siren, and alert you on your mobile as soon as someone steps into your garden.

From a selected starter kit you can expand the system even further with extra motion detectors for indoor or outdoor use, door contacts, smoke detectors or cameras.

### **Garden detectors**

Motion detectors in your garden or driveway warn of potential burglars at an early stage.

Don't wait to receive a burglary alarm until a burglar is already in your home, but secure your home inside and out.

AJAX outdoor detectors prevent an actual burglary.

This makes AJAX unique and therefore the best alarm system:

- **Wireless detectors** with a range of up to 1500 meters
- Most items are **Anti-masking & Anti-jamming**
- Can have up to **9 partitions**
- **Early motion detection** in your garden prevents an actual burglary in your home
- **Pet friendly:** Does not react to birds, dogs or cats
- Full control with **smartphone**
- Receive **worldwide** notifications on your smartphone when detecting or jamming
- Monitor your home in **Full HD**
- **2-Way communication** with all detectors
- Detectors up to **7 years** working on supplied **battery**
- **More reliable** than a wired system thanks to constant connection to the Cloud
- Available in **Black & White**

The most important thing about the AJAX alarm system is the quality of the products and what you can do with them. The AJAX alarm system has not only motion detection inside, but also detection outside your home or business.
