## GOLF GAME TIPS

**Tip 1: A New Breakthrough Hybrid Technology replaces Conventional Driver.**

This super-hybrid has laser accuracy with driver distance.

It is a perfect blend of a hot driver face with oversized hybrid shape.

- 1.1 **The weight of the club is back for high launch.**
- 1.2 **The Shaft is shorter for solid centre strike.**
- 1.3 **Centre of gravity is lower making it easier to get the ball in the air.**

**Tip 2: If you've never used a Rangefinder, you're missing out.**

This is one of the fastest and easiest ways to lower your scores, and become devastatingly precise with your irons. Using a MSG Rangefinder allows you to know the exact distance from the pin...So you can always choose the right club, and get onto the green much easier, setting up easy putts for birdie and par.

This makes the MSG Rangefinder significantly more accurate than other brands.

By taking the slope of the golf course into account, you'll get a much more accurate read... Giving you a huge advantage over your playing partners.

### Here's What This Means for Your Game:

- You'll shoot much lower scores
- You'll choose the correct club every time, so you can get onto the green much faster.
- You'll shave time off your round, as you spend less time figuring out the correct club.
- You'll judge the distance from the green from precision.

The MGS Rangefinder measures any range up and down hills from 5 to 800 meters, with 1 m +/- accuracy. Plus the 6x magnification and the "Continuous Scan" function allows you to determine exact distances of multiple targets at once. It's perfect for measuring your distance from golf flags, hazards and wooded areas one after another.

### NEW PIN SENSOR TECHNOLOGY

Provides for fast measurement with 1 m accuracy, together with Pin sensor technology to accurately measure overlapping subjects, perfect for measuring golf flags, hazards and wooded areas (Yards or Meters). Includes Jolt Technology to alert you when you've hit the pin.

### THROUGH THE LENS DISPLAY

Premium, ultra-clear, multi-layered optics with easy-read, through the lens display with distance and battery meter, and continuous measurement mode for fast, convenient measurements.

### LIGHTWEIGHT AND PORTABLE

This rangefinder is easy to store in your golf bag so you can easily access it while out on the course.

There are no cables involved because it's powered by batteries. It is easy and convenient to use. **The Rangefinder is the perfect tool to improve your accuracy with your irons and give you a huge edge over your playing partners!**

### Tip 3: Short Game Shot.

Today's top touring pros are incredibly skilled around the greens. It doesn't matter if they find their ball buried in deep rough, stuck behind a tree, or at the bottom of a deep bunker - they find a way to get up and down.

So...how do they do it?

Top tour pros have developed an arsenal of different shots to help them adapt to different situations on the course, and by selecting the right shot at the right time they can make difficult shots seem like a piece of cake.

One of the shots that many of today's top players rely on around the greens is a basic chip-and-run. While this simple shot is easy to learn, it's amazing how many of my playing partners don't do it properly.

Here's how to play a chip-and-run like a pro:

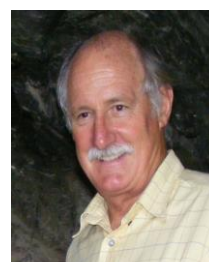

**Choose the right club.** For most players a chip and run shot is best executed with a midiron like a 6, 7, or 8 but you can experiment with other clubs in your bag as well. Just keep in mind the higher the loft the more the ball will carry and the less it will roll.

**Tilt it up on the toe.** To position your club properly for a good chip and run shot you want to tilt it up on its toe, and also address the ball toward the toe of the club. This will help you establish the right body position for the shot and make it harder to use your wrists during the swing (which you don't want to do).

**Hit it like a putt.** Once you've positioned your club properly you'll want to make a smooth pendulum stroke with your shoulders - just like hitting a putt! The extra loft on the club will pop the ball up the air and then it will land and roll out softly to the target.

It doesn't take much practice to master this simple shot, and once you do you'll find it much easier to get up and down in many different situations.
