

## RULES OF OUTDOOR JENGA

### **OBJECT**

Remove one block at a time from the tower and then stack it on top.  
The last player to stack a block without making the tower fall wins the game.

### **SETUP**

Empty the blocks onto a flat surface.  
Turn the box upside down.  
One person builds the tower by placing layers of wooden blocks at right angles to each other.  
When finished, you'll have a solid tower that can more than double in height during play.

### **GAME PLAY**

The player who built the tower goes first. Play passes to the left. Carefully remove a block from anywhere below the highest completed story. Then stack the block on top of the tower at right angles to the blocks just below it. Remove and stack one block per turn. As play proceeds and the weight of the tower shifts, some blocks become looser than others and are easier to remove. You can touch other blocks to find a loose one, but if you move a block out of place you must fix it before touching another block. While stacking, always complete a block story before starting a new level. Your turn ends 10 seconds after you stack your block or as soon as the player to your left touches one.

### **WINNING**

If you're the last player to stack a block without toppling the tower, you win! The player who makes the tower fall gets to set up the tower for the next game.

### **SOME INFORMATION TO NOTE**

The Cypress wood used to make this product is from sustainable plantations.

Cypress wood was chosen because it is strong, light and the finish is smooth.

Cypress wood has natural oils, that remain in the wood long after it has dried, which help to preserve the wood and extend the life.

A non-toxic, edible oil can be used to preserve the wood further and ensure it lasts longer.

Even though this game is an outdoor game, please take care not to leave it outdoors if raining or over night as the wood will be included to draw moisture.

### **DISCLAIMER**
