### Bekasecure post system with coverplate

The Bekasecure posts have a unique patented profile and are available with or without base plate.

The fixation of the panels is secured by the use of a continuous cover plate and specific inox security bolts.

The post's design and high yield strength steel provides the ultimate in high security, rigidity and ease of installation.

The open profile of the Bekasecure post allows electrical or fibre optic cabling.

### Profile

Post profile "Omega"

With a double range of holes 10 x 20 mm for the fixation of panels and coverplates.

Post profile:
