LET'S DIVE

White Shark Projects

Established in 1989 White Shark Projects is an award winning, world leading organisation that focuses on conserving the great white shark and bronze whaler shark through responsible tourism and research.

In 1991 White Shark Projects were Instrumental under South African law to have the white shark protected from human interference and many other environmental factors. The Bronze Whaler shark is now protected since January 2022 and we have the honour of seeing these magnificent animals in our waters these past four years.

We are Involved In film, conservation, education, diving and viewing. We have three registered Non-Profit Organisations dedicated to social uplifted, environmental health and job creation.

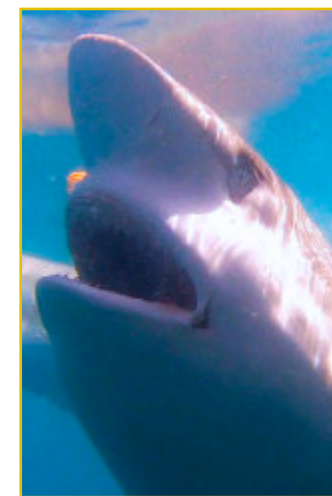

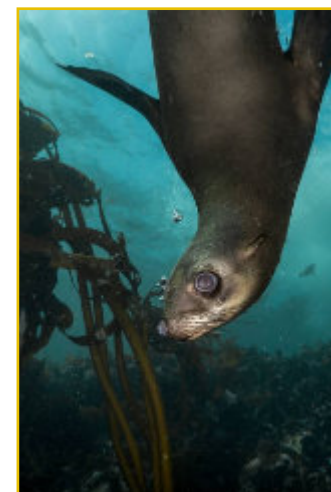

Our Boat

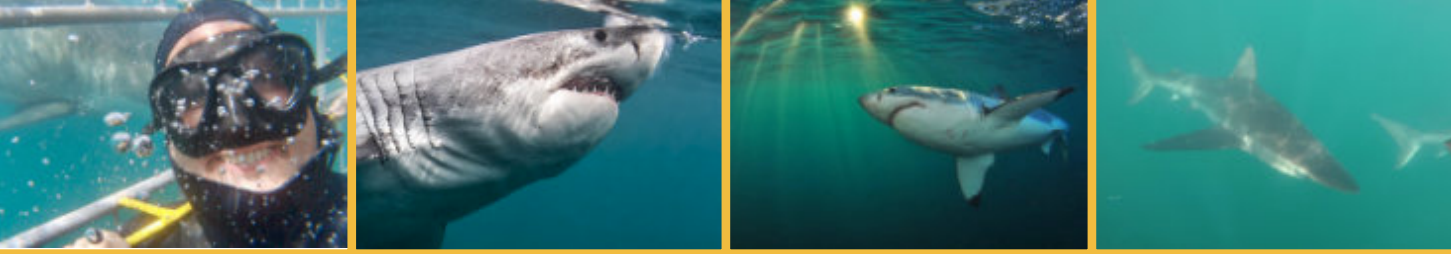

Our Shark Team vessel is a 36-foot catamaran custom built for shark cage diving and viewing. We take 20 clients and five crew members on board. Our crew have over five decades of experience between them so you will be in the safest hands out there in the ocean. We are bonded by SATSA and carry full comprehensive public insurance and passenger liability.

What will I see?

We never know for sure what we will see in one trip, every day is different. Dependant on time of year we have the potential sightings of the Great White Shark, Bronze Whaler Sharks, Short-tailed stingrays, Cape fur seals, whales, dolphins and of course a variety sea birds.

THE BEST SHARK CAGE DIVING OPERATOR IN THE WHOLE OF SOUTH AFRICA

Mission Statement

We are humbled by the privilege of Interacting with one of the earths greatest predators. Working face to face and causing no harm, we are committed to furthering the chances of their survival. Everything we do we aim to do In harmony with and for the health of our natural and social environment.

Single Used Plastic Free Company

At White Shark Projects we are passionate about sustainability and protecting our planet. White Shark Projects is the ONLY shark cage diving operator In Gansbaai South Africa that can proudly say It is 'Single Used Plastic Free'.

We live, breath and work in the ocean so we must be ambassadors to protects its health and longevity. Every client that dives with us are gifted a reusable water bottle that they can take home with them as a souvenir and pave the way for less single used plastic bottles in our environment.

Eight million tonnes of plastic are estimated to enter our oceans every year. Plastic pollution causes chaos for marine life – entangling species and being ingested by them too. It is all our responsibility to cut down on plastic and recycle where possible.

So, join us and make a difference!

DIVE WITH US AND DIRECTLY CONTRIBUTE TO CONSERVING OUR PLANET

White Shark Projects in Gansbaai runs two Non-Profit Organisations called 'Recycle Swop Shop'. On a Tuesday and Thursday after school at 2pm our local children bring us their recyclable materials. We check and weigh the items and trade them for points which they can spend inside our shop. We have taught our local children the value of recycling and as a reward they can buy vital school supplies, health care products, clothing, shoes, toys, books and more. We can do this because of YOU choosing to dive with us. A portion of every dive goes directly back into our community supporting these amazing recycling initiatives.

We also run an onsite soup kitchen, so all our children get a cup of homemade soup as an extra reward for their achievement. We Cannot Do It Alone But Together We Can Make a Difference

Choose Us For Your Adventure and Make a Positive Impact For South Africa!
