

## NICS BABY CONSULTANCY

*"It's the small things"*

Good morning colleagues,

I am so happy and excited to share my new venture with you. Finally, after 20 years in the nursing field and with 15 years' experience in Paediatrics I would like to tell you about NICS BABY CONSULTANCY. A very passionate dream of mine, being a support system for first time parents and giving them time, patience and practical advice.

I have so many things planned, but reality is that Rome was not build in a day :)

My target group is new parents, new moms and babies. At the moment I can offer the following services:

- Breastfeeding support for new mothers, but I offer a home visit service for their convenience.
- I also do baby weight clinics and growth checks at various venues TBA weekly.
- Baby growth checks at the clients' home for their convenience.
- A basic life support workshop that inform parents and carers on what to do with those unplanned emergencies, choking and fevers etc.

I am eager to take on any referrals for:

- Breastfeeding issues and support
- Weight checks and follow ups at home
- Wound care post C-sections
- Administration of IM injections of antibiotics (when prescribed) to patients if they prefer not to come to casualty daily
- Administration of RSV vaccinations when prescribed
- Home visits to go and check on a child/baby if parents need reassurance or basic advice

My company is registered: 2016/046137/07

My practice number: 0878200, so parents can claim certain services from medical aid.

Feel free to contact me anytime by phone or email if you have any questions about my services or if I can help in any way in the paediatric community. I am working towards my own premises one day where I can offer vaccinations etc, but the logistics and admin is slightly more difficult than anticipated.

I am in the process of getting my business cards and information leaflets ready for print and will gladly deliver some at your rooms soon. I will be grateful if you can share my services to other colleagues, potential patients and clients should the need arise.

Kind Regards

Sister Nicolene Stander
