NEON SEO B(OO|U)STERS

A wide range of Black Hat SEO services.
Let's fuck Google together.

Who are we?

Neon SEO Team is a team that specializes in black SEO promotion, including hacking websites and developing software to further embed links on those sites.

What do we offer?

From us you can buy software for automating SEO processes, access to hacked sites, and many other interesting things. There will be a separate slide about each service with a detailed explanation.

What is our goal?

We want all of our clients to have the opportunity to use SEO promotion methods that are currently available only to companies with huge budgets. Everyone should be on equal terms!

our community

After purchasing the software, you will receive an invitation link to the Telegram group. There you can find several sections in which you can both discuss software and SEO promotion schemes.

Currently there are more than 500 participants in the group. Don’t waste time looking for schemes anywhere, join us!

Our team is engaged in hacking WordPress sites. And we are ready to sell you access to the admin panel of these sites.

What is this for?

You can place links to your site from a hacked resource. This has a very good effect on a site's ranking in Google, since hacked sites are often of very good quality.

You can also post your page with content and promote it in Google. Due to the good quality of the site, the page immediately receives good positions

There are a lot of options for use, you are limited only by your imagination.

Back to menu

In stock:

70,000 accesses with the ability to create a new post with your own content.

12,500 accesses with the ability to edit all pages of the site (including the homepage) + the ability to create a new post with your own content.

Database update:

On average, **4,000 sites** are added weekly.

At the same time, about **1,500 sites** per week are removed from our database because the owners change their passwords.

Prices:

Access with the ability to create a new post with your own content:

- $0.60 per access;
- $0.40 per access when purchasing 5,000 or more;
- $0.30 per access when purchasing 20,000 or more.

Access with the ability to edit all site pages (including the homepage) + the ability to create a new post with your own content:

- $1.20 per access;
- $0.80 per access when purchasing 5,000 or more.

Back to menu

IMPORTANT

At these prices, we sell a mix of sites (i.e., we randomly select the specified number of sites from our database).

If you need to filter by certain parameters, we can do that, but the price per unit will be higher than listed (depending on the minimum criteria you specify for the site).

GUARANTEES

We guarantee high quality and re-verification of accesses on our part before the sale to ensure you do not waste your money! We also guarantee the replacement of invalid accesses within 2 working days if any are found.

FILTERING

Filtering is possible by the following parameters:

- GEO
- Language
- DR (Domain Rating)
- Domain Donors
- Backlinks
- Keywords
- Traffic

HOW TO BUY?

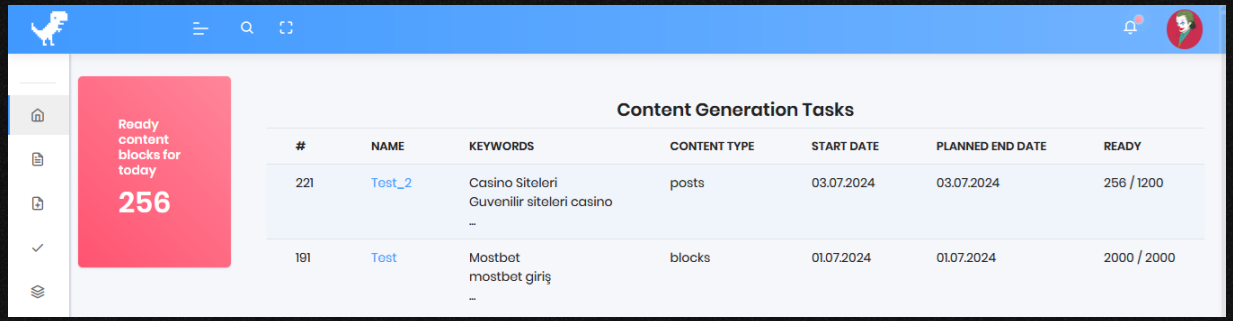
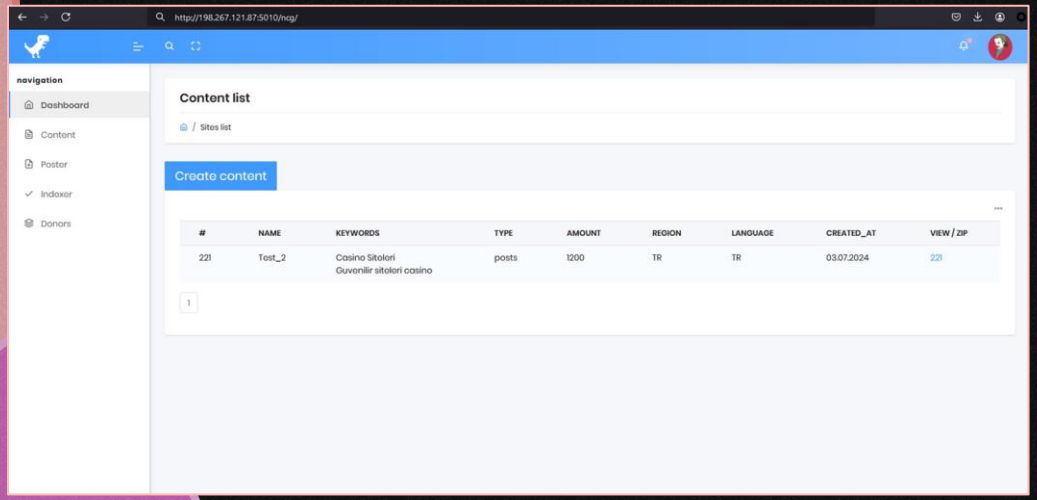
NCG: NEON CONTENT GENERATOR



Content generation has never been so cheap. No more subscriptions, Pay once and use forever. All necessary resources are included in the price.

Back to menu

HOW IT WORKS?



The functionality of the program is based on:

- parsing content from search results,
- AI content generation,
- content synonymization,
- content translation.

To create the best quality content, you will be given the opportunity to combine all these methods in any order and with any number of repetitions.

Back to menu

example of a generation scheme.

step 01

Parsing content from search results.

step 02

Translating content into target language.

step 03

Content analysis using AI

step 04

Writing posts using AI based on analyzed content

step 05

Ready. Content can be published

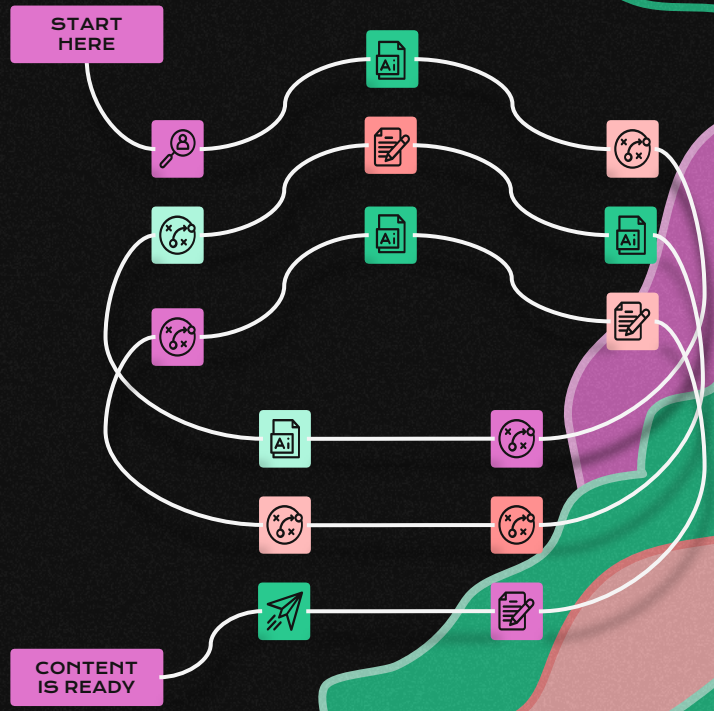
ABOUT Generation ALGORITHMS

On the Slide Above we have provided an example of a content generation scheme that our client shared with us.

But what's the main thing? You can swap the steps and repeat them as many times as you like.

This way you can create your own unique scheme that no one can repeat.

Say NO to template texts!

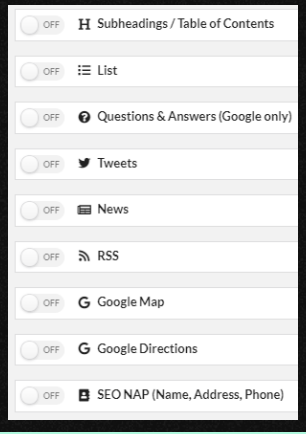


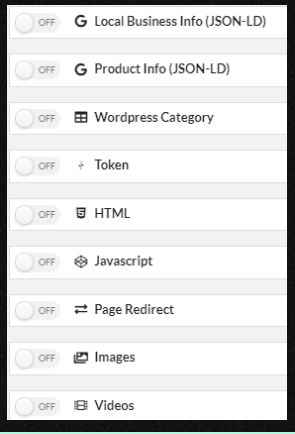
Back to menu

Variety of content blocks to insert

The software can generate and insert various blocks into content to diversify it. Below is a list of possible blocks:

- Links
- Images
- Videos
- Titles
- Headings
- Lists
- News
- RSS
- Google Maps
- Google Directions
- SEO NAPs
- Business Infos
- Product Infos
- Categories
- Tokens
- HTML
- Javascript
- Page Redirect





Important. Each block can be configured separately and the probability of its insertion can be set.

Resources needed to get started

This have not happened before!

You do not need to purchase any additional APIs to get started.

We took care of everything!

All necessary APIs are already built into the program and do not require constant manual updating.

If the limits for any API key expire, it will automatically be replaced with a new one from our database.

How can this be free?!

Our team uses vulnerabilities in the services we need and gives you the opportunity to use them with us.

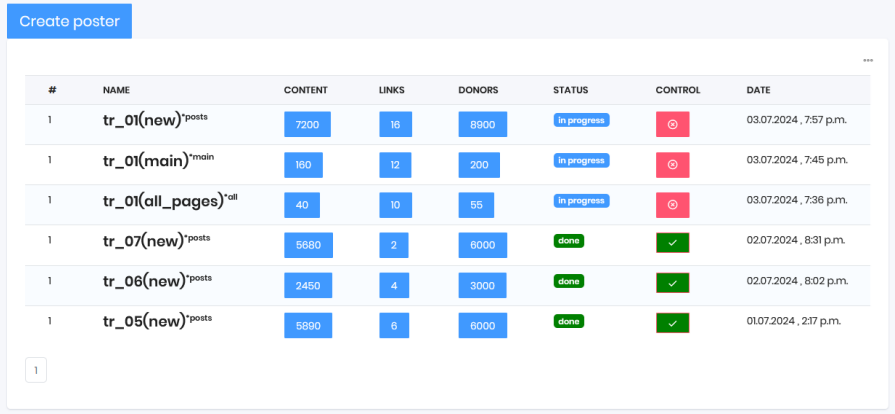
Feel the Power of Black SEO with NAP

Back to menu

ABOUT Programm



The program uses various methods of connecting to hacked sites (including browser emulation) to achieve the best performance when posting content.

Along with the efficiency of content placement, we can guarantee your cyber security through the use of proven combinations of proxy connections and double-bottom technologies.

You will remain incognito.

Back to menu

HOW IT WORKS

STEP 01

Import your content

Upload your content to the program (all possible file formats are supported)

STEP 02

Import site access

Load access to sites into the program

STEP 03

Let's go!

Just click "Run"!

Everything else, such as category generation, publication scheduling, cross-linking, is optional and can be included as needed.

Back to menu

LIST OF ALL PROGRAM FUNCTIONALITY

The program was developed under the guidance of the SEO department, so it has all the functionality you need, namely:

- publication scheduling,
- automatic selection of categories on the site,
- tag generation,
- cross-linking of posts,
- setting up tier2 tier3 links,
- daily monitoring of posted links,
- auto import content from NSG,
- auto export of content to NLI.

Back to menu

Resources needed to get started

All you need is access to sites!

You don't need to purchase any additional APIs, VPNs or proxies to get started.

We've taken care of everything!

All necessary APIs and proxies are already built into the program and do not require constant manual updating.

If any API key or proxy expires, it will be automatically replaced with a new one from our database.

How can this be free?!

Our team exploits vulnerabilities in the services we need and gives you the opportunity to exploit them with us.

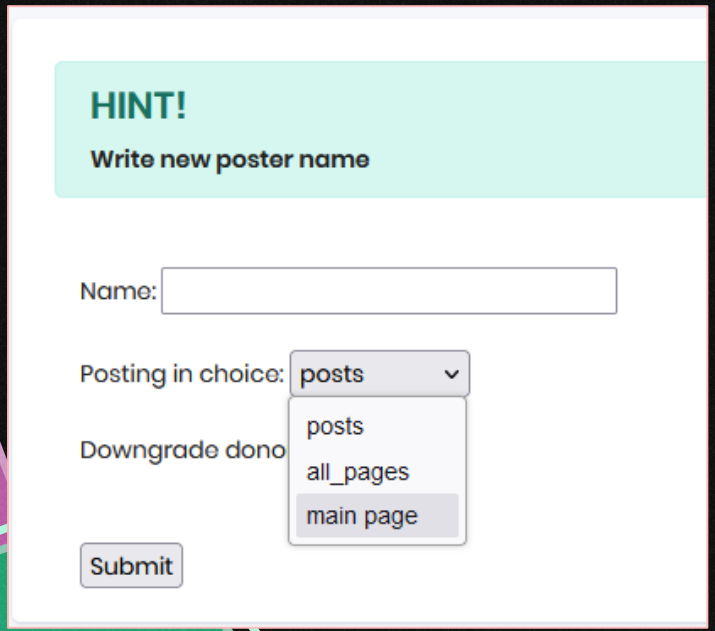
ADDITIONAL MODULES FOR NAP

Not just new posts. Try cross-links and links from home pages.
This is what really works!

Back to menu

ABOUT MODULES



Additional modules will give you the opportunity not only to create new pages with your content, but also to place blocks of your content on any pages of the site, be it the main page or even on all pages at once.

Resources needed to get started

- installed NAP
- Access to sites with the ability to edit all site pages

In fact, a field with a choice of the type of links(main_page, all_pages) will be added to your NAP. For these links, all the NAP functionality is still available.

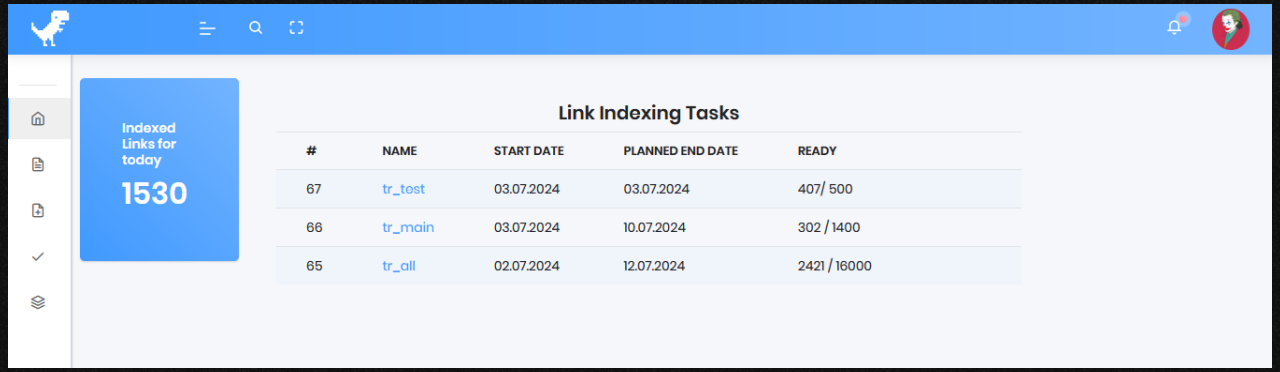
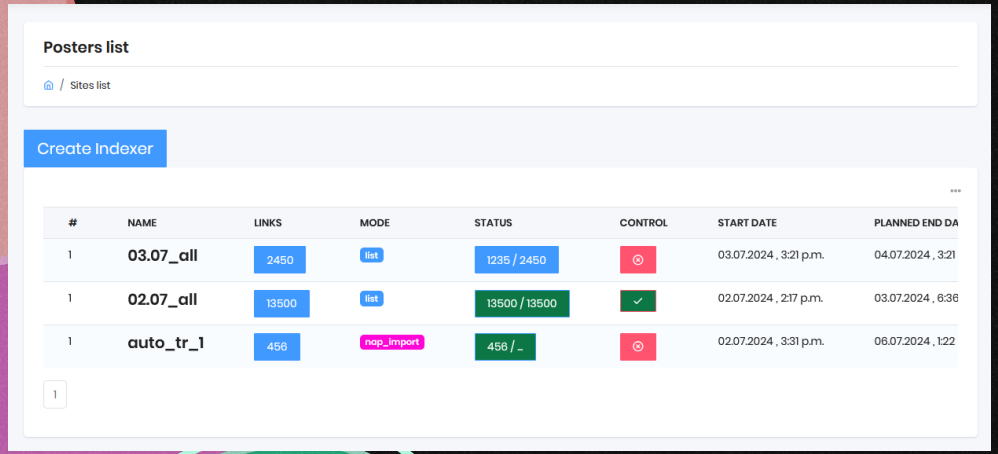
NLI: NEON Link INDEXER



Link indexing for free? YES, and without quantity restrictions.

Back to menu

ABOUT Programm



The program uses the so-called "link springboard" to index your links.

We have access to tens of thousands of sites and we can create as many redirects there as we like. With the help of these redirects, your links will be included in the index.

You don’t need to worry about the fact that your sites may be affiliated, since we have restrictions on donors of redirects based on projects (for each project there is a separate database of sites for indexing links)

Back to menu

LIST OF ALL PROGRAM FUNCTIONALITY

The program was developed under the guidance of the SEO department, so it has all the functionality you need, namely:

- indexing scheduling,
- daily monitoring of link indexing,
- auto import links from NAP.

PAYMENT PROCEDURE

Algorithm for carrying out the payment procedure.

It is important! Read this!

Back to menu

To speed up the payment process and resolve most issues, we have compiled this short payment guide.

Second.

We conducted an analysis of our financial activities and found that 90% of the time we spent on clients with small checks ($10-500) brought us only 9% of profit, while 10% of the time spent on serious teams with good purchases brought us the rest 91% profit. Therefore, as of July 1, 2024, we decided that the **minimum amount for making a purchase from us is $500**.

We understand that this may be a lot for some, but **business is business**.

The first thing you must understand.

Time is money. Therefore, we ask you to contact the manager only if you are really interested in purchasing. Please don't waste our time or yours.

Distribution of total profit by average check
