FUNGI  
VIRUSES**

*40% ALCOHOL*  
*COVERS 40-60M<sup>2</sup>*

180ml

**Mediguard Anti-Microbial Sanitising Fogger is a low viscosity disinfectant, an excellent antiseptic, antibacterial and viral spray in an easy to use aerosol container to effectively sanitise surfaces.**

### DIRECTIONS FOR USE

- Close any open doors or windows in the space you wish to disinfect. Eliminate as much air movement as possible by turning off fans and air conditioning units. No pets or people should be present in the space being disinfected when the sanitising fogger is activated, so be sure to safely remove them from the area. Place the canister on a few sheets of newspaper in a central location; a higher position on a table or counter can allow the sanitising fogger to reach a larger area.
- Once the area is prepped and the canister is correctly placed, shake the room sanitising fogger can well and set the can in the middle of the newspaper. Next simply push the button or tab till it locks, and quickly leave the room. The sanitising fogger will release a powerful spray that disperses disinfectant content throughout the entire space. After hanging briefly in the air, the sanitising fogger will settle on various surfaces, disinfecting and deodorising everything it touches.
- It is safe to return to the room one hour after treatment. Once the appropriate interval has passed, you can return to the room and collect the canister and newspaper. It is recommended to open a few windows or doors to air out the room after treatment is complete.

### CAUTION

Avoid standing directly over the aerosol when releasing spray. Flammable. Keep away from heat/sparks/open flames/hot surface - No smoking. Do not spray onto an open flame or other ignition source. Pressurised container: Do not pierce or burn, even after use. In case of fire, use water, carbon dioxide or dry chemical for extinguishing. Protect from sunlight and do not expose to temperatures exceeding 50°C. When using this product do not use in or near eyes. If accidental contact with eyes, rinse immediately with plenty of water and seek medical advice. Always keep out of reach of children. Harmful if swallowed. Seek medical attention and do not induce vomiting. Discontinue use if irritation and redness develop. If condition persists for more than 72 hours consult a doctor. Avoid contact with broken skin.

### TECHNICAL DATA

Active Ingredient: Chloramine-T  
Contains Alcohol  
Colour: Clear  
Fragrance: Citrus  
pH: 6.0 - 8.0  
Viscosity: 200cps

FLAMMABLE
